RODEO

OWNER'S HANDBOOK SUPPLEMENT

1992 TF SERIES

Isuzu-General Motors Australia Limited
Australian Company Number 006 962 572

Part no. 92074143 July 1991

This supplement is supplied, in addition to the Owner's Handbook, to provide information about the 1992 model TF Rodeo.

Please keep in the glovebox, together with the Owner's Handbook, for any future reference.

CUSTOMER ASSISTANCE

The Customer Assistance representatives can be telephoned from anywhere within Australia for only the cost of a local call. The Melbourne area number is 647 1016. Outside the Melbourne Metropolitan area, the number is 008 032 608.

CHECK ENGINE WARNING (petrol 4ZE1 engine only)

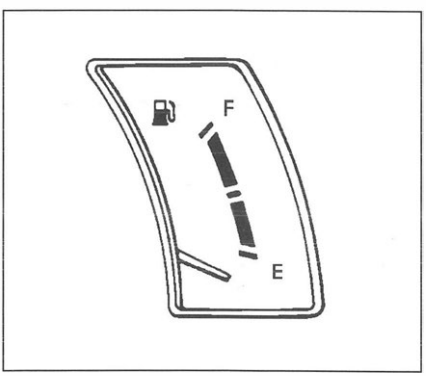
Your vehicle is fitted with an Electronic Engine Management System.

CHECK ENGINE

If the check engine light comes on whilst driving (either intermittently or continuously) then service to the Engine Management System is required. Although the Rodeo may still be driveable and does not require towing, see your Holden Dealer as soon as possible for an inspection of the System, as continued driving could affect fuel consumption and engine performance.

NOTE: To check that the bulb is working, this warning light will come on for about four second when the ignition key is turned to the "ON" position.

FUEL GAUGE



The fuel gauge indicates the level of fuel within the fuel tank. 'F' represents full, 'E' represents empty.

If your Rodeo is fitted with a tachometer the gauge will show fuel tank contents at all times, regardless of the ignition key position.

If your Rodeo is not fitted with a tachometer the needle in the gauge will fall to empty when the ignition is turned off. Fuel tank contents will again be displayed when the ignition is turned to ON.

Refer to information on the inside of the rear cover of the Owner's Handbook when refuelling.

AIR CONDITIONING (if fitted)

Also refer page 1-9 and 1-10 of the Owner's Handbook for heater controls.

The air conditioner on/off switch is located in the heater control panel. The switch will glow blue when the air conditioner is working. Note that the fan switch must be set to 1 or above for the air conditioning to work.

Hot weather For a "quick cool down" when first entering the vehicle on a hot day, switch on the air conditioner, select *re-circulate*, move the temperature lever to full cold and turn the fan to a high speed. Also open the windows to allow the hot air to escape. After a minute or two, close the windows (the air conditioning works more effectively with the windows up).

It is recommended that when the interior cools down (approximately 10 to 20 minutes) to select outside air (rather than re-circulate) to achieve and maintain best comfort conditions during extended driving.

The coolest temperature however, is achieved when *re-circulate* is selected. This can be used in slow city traffic or when the vehicle is stationary in very hot weather. Occasionally select *face* or *bi-level* to allow outside air to enter the vehicle.

Exhaust fumes The air conditioner not only removes heat from the air, but also removes dust, odours and exhaust fumes, useful if following another car or when travelling in dusty conditions. Ensure all the windows are closed and preferably have the fan on a high speed.

Cold weather The air conditioner also removes moisture from the air. By moving the temperature lever away from extreme cold ensures that the air will be reheated after it has been purified.

Therefore, if the side windows or windscreen fog up on a cold day, switch on the air conditioner, turn the fan switch to a high speed, select 'demist' and select a warm setting with the temperature lever. This will circulate warm, dehumidified air throughout the vehicle, defogging the windows.

Fuel consumption When air conditioning is not needed, remember to turn the air conditioner off, as this will reduce fuel consumption.

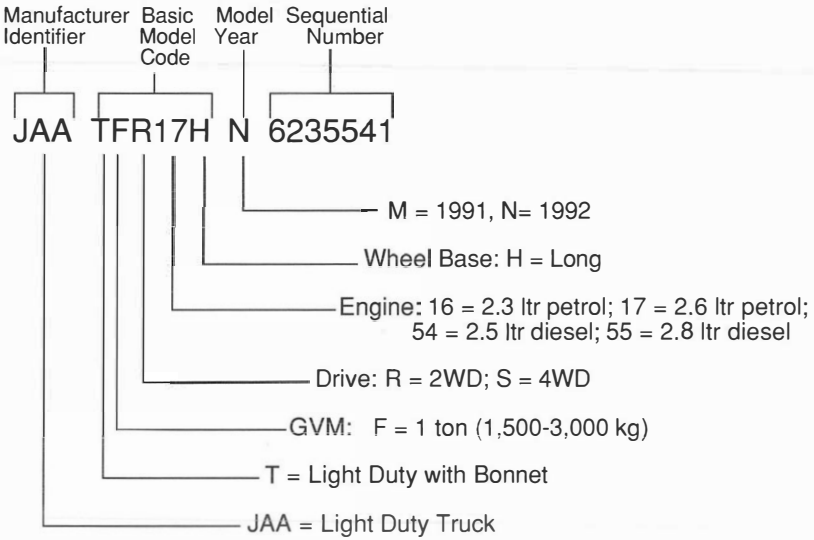
Automatic transmission If your vehicle is stopped for long periods in hot weather with the engine running and the air conditioner operating, select N (neutral) or P (park).

Important Once every two weeks, with the engine running, switch the air conditioner on for 5 to 10 minutes, even in Winter. This will lubricate the air conditioning system and prevent the seals from drying out.

OZONE Your air conditioning system uses 'R12' refrigerant which, if leaked into the atmosphere, reduces ozone. When alternative refrigerants become available R12 will be phased out of production.

If your air conditioning system requires recharging (when R12 is no longer available) modifications to your vehicle may be necessary.

I.S.O.V.I.N. PLATE



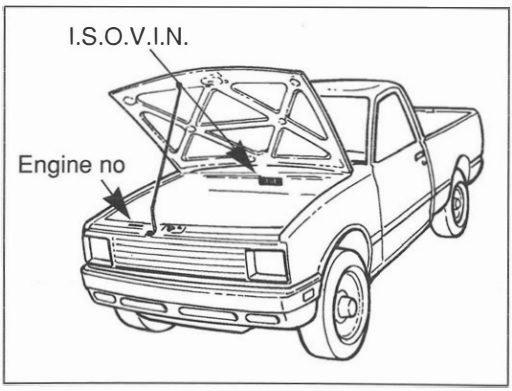
Manufacturer Identifier
Basic Model Code
Model Year
Sequential Number
JAA TFR17H N 6235541
M = 1991, N= 1992
Wheel Base: H = Long
Engine: 16 = 2.3 ltr petrol; 17 = 2.6 ltr petrol; 54 = 2.5 ltr diesel; 55 = 2.8 ltr diesel
Drive: R = 2WD; S = 4WD
GVM: F = 1 ton (1,500-3,000 kg)
T = Light Duty with Bonnet
JAA = Light Duty Truck

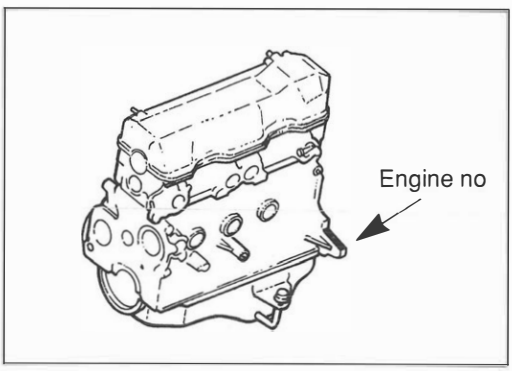
The I.S.O.V.I.N. plate is located under the bonnet.

The engine number for petrol engines is located in two places:

- on a plate in front of the radiator.
- stamped on the protrusion at the rear, passengers side of the cylinder block.

Refer pages 7-5 and 7-6 of the Owner's Handbook for location of the diesel engine number and for the other plates found on the vehicle.





TOWING CAPACITY

You may tow a loaded caravan or trailer weighing up to **1,600 kg**, provided the G.C.M. is not exceeded. This means that if your Rodeo is heavily loaded you would *not* be able to tow **1,600 kg** because the combined weight of the trailer and Rodeo would exceed the G.C.M. Also refer Chapter 3 of the Owner's Handbook.

FLUID CAPACITIES - engine oil and engine coolant

	Petrol 4ZD1	Petrol 4ZE1	Diesel 4JA1	Diesel 4JB1T
ENGINE OIL (litres)

High	1·000	-	-
Low	2·283	-	-

BATTERY MAINTENANCE

The fluid level of the battery will be checked for you when you take your vehicle to be serviced by your Holden Dealer. If your vehicle is operated in hot temperatures or at constant high speed, the battery fluid level should be checked at least twice between the 6 month Dealer Service.

CAUTION:

Batteries emit an explosive gas mixture which may be ignited by sparks or naked flames. You should therefore keep sparks and flames away from the battery at all times. Never smoke near a battery.

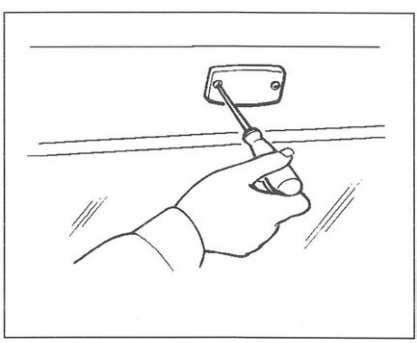
Batteries contain sulphuric acid. If acid contacts skin or clothing, flush immediately with a lot of water. In case of eye contact, flush with a lot of water and contact a doctor immediately.

Take care with all metal objects and tools including items you may wear (e.g. jewelry, ring and metal watchbands) near battery terminals. Metal objects that touch battery terminals can cause sparks and serious heat burns to the user or wearer.

When checking the battery level, make sure the engine is not running. Each of the six cells must be individually checked. Use distilled water, as required, to keep the level between the upper and lower markings on the battery. **DO NOT OVER FILL**.

LS DOOR LIGHT BULB REPLACEMENT (5 watts)

Remove the two screws and the lens. The bulb pulls straight out of the socket.



LS READING LIGHT BULB REPLACEMENT (5 watts)

Pull down the light assembly by hand. Remove the bulb by turning anti-clockwise.
